Victor Larios

Software Engineer expertise in Cloud Service | AWS

✉ victorlarios96620@gmail.com 📞 +1 843 314 4776 📍 4202 SE 30th Ave Amarillo TX

Profile

A seasoned Software Engineer with extensive full-stack development experience and a special focus on cloud technologies, particularly AWS services. I have excelled in varied roles from backend to full-stack development, demonstrating a strong understanding of serverless frameworks and proficiency in creating robust front-end applications using React and Typescript. My expertise in CI/CD practices, building RESTful APIs, implementing scalable and efficient data processing pipelines, and developing responsive web and cross-platform mobile applications, consistently leads to efficient and high-quality software solutions. With a proven track record of collaboration in cross-functional teams, I continue to strive for excellence and innovation in tech.

Professional Experience

01/2022 — 12/2022

Software Engineer, *Fishermen Labs* — Los Angeles, CA
- Extensive experience with AWS services including AWS Serverless Framework, AWS Lambda, and AWS Step Functions.
- Proficient in CI/CD practices and tools such as Docker and Kubernetes.
- Skilled in utilizing AWS services like SES, SQS, and DynamoDB for efficient communication and data storage.
- Proficient in developing front-end applications with React and integrating them with AWS services.

07/2019 — 12/2021

Full Stack Developer, *Sunlight Media LLC* — Los Angeles, CA
- Developed and implemented scalable, responsive web applications using HTML, CSS, and JavaScript.
- Collaborated with cross-functional teams to gather requirements and deliver high-quality software solutions.
- Built RESTful APIs and integrated with third-party systems using Node.js and Express framework.
- React/Typescript: Developed robust front-end applications using React and Typescript, ensuring smooth user experience.
- AWS Serverless Framework: Built microservices and serverless applications on AWS using the Serverless Framework.
- Developed a cross-platform mobile application using Ionic framework

08/2016 — 05/2019

Backend Developer, *Evrone* — San Francisco, CA
- Developed and deployed serverless backend services using AWS Lambda, API Gateway, and DynamoDB.
- Created scalable and efficient data processing pipelines using AWS Step Functions and S3.

- Implemented authentication and authorization mechanisms using AWS Cognito and IAM policies.
- Utilized AWS CloudWatch and SNS to monitor and manage serverless applications for optimal performance.

Education

04/2014 — 05/2018   **Bachelor's Degree,** *University of Toronto*   Toronto, CA

Skills

Node.js   JavaScript   TypeScript   Python   Tailwind CSS   React

Vue   Material UI   AWS Services   AWS Lambda   AWS API Gateway

AWS Step Functions   SNS   SQS   SES   Docker   Kuberbetes

DynamoDB   CloudFormation   CloudWatch
